Q.1 Read the following passage carefully and answer the questions given below -

[1×5=5]

The purpose of education is to make the student an expert in his subject. This must be clearly understood and mere muddling through lesson and lectures and books and passing examination are relegated to secondary importance as means to the end - which is excellence in the field chosen.

But there are so many fields, and no man can become expert in all the fields. It is necessary to decide which fields are important ones that a man should know well.

It is clear that one's own work is the most important. This has been realized, and Modern civilization has accordingly provided vocational education. It is now possible to acquire high professional skill in the various field, medicine, engineering, production, commerce and so on - but with good and bad mixed together and no standard for guidance.

- Q.3 Read the passage carefully and make notes on it and also give a suitable title. [4]

Garbage is a great environmental hazard. It comes from various sources used paper, tiffin packing, plastic bags, ice-cream wrappers, bottle caps, fallen leaves from trees and many more. (Garbage makes the premises ugly, unkempt and breeds diseases.) A lot of trash that is thrown away contains material that can be recycled and reused such as paper, metals and glass which can be sent to the nearest recycling centre or disposed of to the junk dealer. (It also contains organic matter such as leaves which can enrich soil fertility.) A compost pit can be made at a convenient location where the refuse can be placed with layers of soil and an occasional sprinkling of water. (This would help decomposition to make valuable fertilizer.) This would also prevent pollution that is usually caused by burning such organic waste.
